Washington, D. C. 20250

January 8, 1965

GRAIN PRICES GENERALLY HIGHER - SPRING WHEAT LOWER

Cash grain markets started the New Year with a slightly mixed trend. Most grains were unchanged to higher for the week ended January 7. However, spring wheat, rye and flaxseed posted losses.

Winter wheat held unchanged to 2¢ per bushel higher with a generally good demand. Mills were active buyers for top qualities while export interest was less active. Farm selling continued limited with market receipts light. Spring wheat declined 3-4¢ per bushel reflecting more liberal country offerings and very slow flour business. Durum wheat remained at last week's level with demand only fair. Wheat markets were quiet in the Pacific Northwest with no new export business and limited mill demand. No. 1 soft white held unchanged at Portland. Rye declined 1¢ as mills provided only limited demand and there was no export activity.

Corn markets moved within narrow limits, with prices mostly unchanged to slightly higher. Country offerings continued light while both domestic and export interest were moderate. Most buying was limited to current needs. White corn was sharply higher. Oats advanced 1¢ per bushel as light receipts failed to meet the fair demand. Malting barley held steady with a somewhat improved demand. Prices for feed and top quality malting barley were unchanged but some of the intermediates went up 4-6¢ per bushel. Grain sorghum advanced 1¢ per cwt. on an average with a fairly good demand for available offerings.

Soybean markets strengthened with prices mostly 3¢ per bushel above a week ago. Higher prices for both oil and meal were strengthening factors. Domestic and export interest continued fair. Flaxseed declined 3¢ per bushel with more liberal offerings in the country.

Food for Peace Authorizations and Agreements	8

FIRST TITLE IV, PL 480 AGREEMENT WITH PRIVATE TRADE ... was announced January 6. This is the first Title IV, Public Law 480 long-term dollar credit Food for Peace agreement with a private business firm, the Persian Gas Distribution Co., S.A. (PERSIGAS), of Tehran, Iran. All previous Title IV agreements have been on a government-to-government basis. Under the agreement, PERSIGAS will be authorized to purchase up to \$674,000 worth -- about 360,000 bushels -- of U. S. wheat for resale in Iran. The Commodity Credit Corporation will finance the sale, plus an additional amount for ocean transportation, making the total export market value of the transaction \$750,000. The Iranian company will use the currency (rials) received from its resale of wheat to expand facilities for processing and distribution of liquid petroleum gas in Tehran and other provincial centers in Iran, repaying CCC in dollars out of profits from the expanded operation over a 7-year period at an annual interest rate of 4 percent. Sales of U. S. wheat under the agreement will be made by private U. S. traders. Purchase authorizations will be announced later.

Grains: Export prices basis prompt or 30-day shipment, January 7, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern	:			
	Spring, 14% protein.	1.84	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.68	1.43	2.94	1.30
Gulf	No. 1 Hard Winter:	:

	14% protein	1.87	-	-	-
Pacific Northwest	No. 2 Western White ...	1.52	-	-	1.20

1/ The export payment rate for wheat on January 7, was 24¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore and hard winter from the Gulf, and 13¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ July 1-December 31, 1964 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1-December 31, 1964 for corn and soybeans.
2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of December 31, 1964, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$1,892,808,460. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$45,264,223. These sales left a combined feed grain certificate value of \$2,808,858,978 as of November 30, 1964.

SOYBEANS SHARPLY HIGHER - OTHER GRAINS ABOUT UNCHANGED

Cash grain markets were mostly quiet during the week ended January 14, due in part to the dock strike on the Gulf and Atlantic ports. Soybeans, however, were the exception and prices closed on a higher level.

Hard winter wheat held mostly steady with only minor price changes. Active demand from mills absorbed the generally light offerings and tended to offset the unfavorable impact of the dock strike. Export buyers were mostly on the sidelines. Soft red winter wheat was 1-2¢ per bushel lower with a limited demand for light offerings. Spring wheat gained 1-2¢ per bushel reflecting more active interest in flour and semolina. Soft white wheat went up 1-2¢ per bushel in the Pacific Northwest due in part to increased export business. Rye declined 5¢ per bushel under dim prospects for export and report of large farm stocks.

Corn prices fluctuated within narrow limits with demand generally good for somewhat larger offerings. Export sales held up well. Oats closed unchanged to 1¢ lower in very light trading. Barley quotations held at last week's level at most markets. Grain sorghum prices held steady with an even balance between offerings and demand.

Soybeans advanced 10¢ per bushel with improved buying from both processors and elevators. Strength stemmed in part from reports which showed farm holdings as smaller than expected. The maturity date on 1963-crop soybeans under resale was set for July 31, 1965, and there will be no resale on the 1964 soybean crop, the Department announced January 14. Flaxseed held unchanged in quiet trading.

GRAIN EXPORTS DURING CALENDAR YEAR 1964 ... totaled over 1.6 billion bushels -- a new record and 14 percent more than the previous record of 1.4 billion in 1963. Exports of wheat, corn and soybeans hit a record high on the basis of inspections for export. Exports of wheat, grain only, totaled 757 million bushels during the calendar year 1964 -- 18 percent above the previous record of 1963. Corn exports hit a high of 472 million, about 13 percent more than the year before. Over 209 million bushels of soybeans were inspected for export in 1964, an increase of 21 percent over 1963. Grain exports out of the Gulf have more than doubled in recent years with over 1.0 billion exported in 1964 -- nearly 65 percent of the U. S. total. Exports through the Lake Ports have increased moderately with 247 million exported in 1964 -- 15 percent of the total. Exports through the Atlantic Ports totaled 156 million, the smallest since 1954 and represented less than 10 percent of the total. Exports through the Pacific Ports totaled 170 million, down 15 percent from 1963 but only slightly below the 5-year average.

EXPORTS OF U. S. GRAIN FROM CANADIAN PORTS ... last season totaled 95 million bushels as against 103 million in 1963. Of the exports last season 75 million were inspected by U. S. licensed inspectors at these Canadian points while 19.8 million were uninspected. Exports of U. S. wheat from Canadian ports were half of the previous year and totaled 16 million last season. Corn exports from Canadian ports totaled 55 million of which 7 million were uninspected at Canadian points. Less than 6 million bushels of U. S. soybeans were inspected last season at Canadian points while over 12 million were shipped without inspection. The country of destination of the uninspected grain from Canadian ports is not available. However, in the future, through the cooperation of Canadian officials the country of destination of U. S. grain exported from Canadian ports will be shown for both inspected and uninspected grains. (Details page 19).

1/ The export payment rate for wheat on January 14, was 26¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore and hard winter from the Gulf, and 14¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail and truck movement to Canada or Mexico.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

WHEAT: Inspections for export by programs, classes, and country of destination

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

January 22, 1965

GRAIN MARKETS MIXED

Cash grain prices followed a mixed trend during the week ended January 21. Wheat, rye and flaxseed posted losses while soybeans continued to advance and most feed grains were steady to higher.

Winter wheat generally declined 1-3¢ per bushel reflecting the dull export demand, due in part to the dock strike. Mill demand ranged from very slow to moderate. Receipts were ample although farm and interior elevator offerings remained light. Demand for spring wheat from mill buyers was good but prices closed about 1¢ per bushel lower. The drop reflected in part reduced export inquiry. Durum wheat held unchanged although sales of semolina expanded some. Wheat prices in the Pacific Northwest declined 1-2¢ despite rather large export purchases. Country selling at the lower prices slackened. Rye lost 1¢ per bushel reflecting limited interest for light receipts.

Corn markets were firm with prices unchanged to 1¢ per bushel higher. Demand was active for fairly large receipts. Export interest continued steady. Oats were on the easy side with prices unchanged to 1¢ lower. Barley markets were strong reflecting a good demand. Prices were higher at Minneapolis and unchanged to 1¢ higher at Portland. Grain sorghum prices were unchanged to 1¢ per cwt. higher with fairly good demand particularly at Ft. Worth.

Soybeans continued at the high level of recent weeks with price advances ranging 2-5¢ per bushel. Higher prices for both oil and meal were strengthening factors. Crushings in December were only slightly below November but 10 percent above a year earlier. Flaxseed declined 2¢ in very light trading.

Wheat and flour - export payment rates	6
Grains - export prices at specified points	6
Grains - quantity outstanding under price-support resale loans by States, December 31, 1964	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - quantity put under price support, repaid and outstanding by States.	8-15
Grains - quantity under price support	16

PRICE SUPPORT ACTIVITIES ... through December 31 show that farmers put 164.0 million bushels of 1964-crop wheat under price-support loans. This compares with 145.3 million of the 1963-crop and 213.5 million of the 1962-crop put under by the end of December previously. Of the total put under loan, farmers had repaid loans on 25.6 million bushels of wheat. Farmers had put 106.9 million bushels of 1964-crop corn and 18.5 million bushels of soybeans under loan by the end of December. Farmers had repaid loans on 0.6 million bushels of corn and 2.0 million bushels of soybeans. From the 1963 loan program, farmers resealed 10.6 million bushels of soybeans. By the end of December less than 8.0 million bushels of 1963-crop soybeans remained under resealed loans. Under a new system of making advance application for total price support, effective with the 1964 crops, farmers can estimate total eligible production upon which they might wish to obtain price support prior to expiration dates for such action in 1965. These applications as of December 31, which include the quantity under loan show the following: Barley, 22,406,232 bushels; corn, 251,855,380; flaxseed, 8,269,179; oats, 60,224,122; rye, 5,542,113; soybeans, 36,323,096; wheat, 254,950,325 bushels and grain sorghum, 48,546,184 cwt. (Details, pages 7-16).

SOYBEAN CRUSHINGS ... totaled 43.2 million bushels during December as reported by the Census Bureau. This is slightly less than in November but nearly 4 million more than in December 1963. Crushings, October-December, totaled 131 million this season as against 119 million last season. Exports, October-December, are estimated at a little over 80 million bushels compared with 63 million the same months in 1963. Stocks of soybeans at crushing plants at the end of December totaled 148 million bushels as against 107 million a year earlier. Crushings of flaxseed during December totaled 1,761,000 bushels. This was slightly above November and 12 percent above December 1963. Crushing of flaxseed in the six-month period, July-December, totaled 11.4 million bushels this season as against 8.9 million last season.

CORRECTION: Shipment of soft red winter wheat from Canadian ports to Yugoslavia in the amount of 926,000 bushels during December was erroneously listed as commercial sale in Grain Market News for January 15. It should have been shown as Title IV

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	1.80 1.83	1.42 -	3.11 -	2.26 -
Pacific Northwest	No. 2 Western White	1.52	-	-	1.19

1/ The export payment rate for wheat on January 21, was 24¢ per bushel for spring wheat from Duluth, 19¢ for soft red winter from Baltimore and hard winter from the Gulf, and 13¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Wheat: Quantity put under price support, repaid and outstanding by States

STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 8 No. 1

Washington, D. C. 20250

January 27, 1965

Grain prices generally advanced during the October-January period with hard winter wheat and rye the principal exceptions. Grain prices in January were well above a year ago with the exception of wheat and rye which were well below. Stocks of feed grains on January 1 were 10 percent less than last year reflecting smaller holdings of each of the four feed grains. Wheat stocks were down 11 percent from a year earlier while soybeans in storage declined 6 percent from the record high of a year ago.

WHEAT ... prices followed a mixed trend in the October-January period with hard winter wheat declining 4-5¢ per bushel in the period. Soft red winter advanced 1-3¢ per bushel. Supplies of hard winter are ample while those of soft red winter are more nearly in line with expected needs. Spring and durum wheat closed the period slightly lower. At the third week of January hard winter and spring wheat ranged 6-10¢ per bushel above the effective support level with soft red winter and durum wheat either at the support level or slightly below. Stocks of wheat in all positions, January 1, totaled 1,443 million bushels, 171 million less than a year earlier and the smallest since 1958. Of the total stocks 902 million were either owned by Commodity Credit Corporation or under loan. Farmers put 164 million bushels of 1964-crop wheat under price support through December 31 -- 19 million more than a year earlier. Exports of wheat and flour, July through December, totaled 385 million bushels, slightly above last year's record. Milling of wheat for flour at 287 million was 24 million below a year ago. Wheat supplies in Canada for 1964-65 total 1,061 million bushels -- 150 million less than for 1963-64. Canadian exports of wheat and flour totaled 195 million August through December this season as against 258 million the same months of 1963.

RYE ... prices averaged sharply below last season due to the larger supplies and relatively small exports. Prices at Minneapolis in January averaged 27¢ per bushel below a year earlier. Rye stocks of 21.0 million bushels were 6.3 million above last year. Practically all of the increase was in farm stocks. Exports of 1.3 million bushels, July-December, were less than a third those of a year earlier. While rye used for alcohol was the smallest in over ten years, the quantity milled for flour was about the same as last year. Farmers had 3.3 million bushels of 1964-crop rye under price support at the end of December as against 1.5 million a year earlier.

CORN ... prices generally advanced during the October-January period reflecting the smaller crop and the good export demand. Market prices the first three weeks of January ranged from 5-7¢ per bushel above January 1964. Stocks of corn in all positions on January 1 totaled 3,922 million bushels -- 462 million less than a year earlier. Of the total stocks, CCC owned 835 million with an additional 550 million under loan or resale. Exports of 143 million bushels of corn the first quarter were only slightly below last year with wet milling of 47 million also down slightly. Around 940 million bushels of corn were fed the first quarter --

sharply above last year and also above average. The number of grain consuming animal units fed in 1964-65 is currently estimated at 167.1 million compared with 170.3 million in 1963-64 and 168.5 million the 5-year average. On this basis 5.6 bushels of corn were fed per animal unit the first quarter this season as against 5.0 last season and 5.4 bushels the average.

OATS ... prices advanced gradually during the October-January period reflecting in part the smallest supplies in 22 years of record. Market prices in January at Minneapolis and Chicago were 4¢ per bushel above January 1964. Stocks of oats on January 1 totaled 712 million, nearly 61 million less than last year. Disappearance mainly for feed, July through December, totaled 486 million -- 3 million more than the year before -- but otherwise the smallest of record. Exports of less than 3 million bushels were the smallest since 1954.

BARLEY ... prices at the farm, October-December, averaged 3¢ per bushel above the same months a year earlier. Market prices for malting barley at Minneapolis in January were 9¢ above a year ago while feed barley was 1¢ higher on the West Coast. Stocks in all positions on January 1 at 310 million were the smallest since 1957. Disappearance of 234 million the first half of the season was 9 million above the previous season. Exports of 31 million were 3 million higher while industrial use, mainly beer and alcohol, was also 2 million higher. Feed usage was 2 percent above the same months a year earlier. About 13 million bushels of 1964-crop barley were put under price support through December 31 -- 6 million less than a year ago.

GRAIN SORGHUM ... prices at the farm for October-December averaged 15¢ per cwt. above a year ago. Market prices were around 13¢ per cwt. higher the first three weeks of January. Stocks of 533 million cwt. were the smallest in four years and 40 million below last year. Of the total stocks, CCC owned 329 million with an additional 52 million cwt. under loan or resale. Exports of 14 million cwt. the first quarter were 4 million less than in 1963. The quantity remaining for feed at 89 million cwt. was 14 million below a year earlier.

SOYBEAN ... prices at Illinois points for October through January averaged 7¢ per bushel above a year earlier reflecting record exports and crushings. Prices at these points in January averaged 12¢ above January 1964. Stocks of 525 million bushels on January 1 were 34 million below a year ago. Crushings of 131 million and exports of 80 million were well above the record of two years ago. Through December 31 farmers put only 18 million bushels of soybeans under price support as against 50 million a year earlier.

FLAXSEED ... averaged \$3.18 per bushel at Minneapolis the first part of January compared with \$3.10 a year earlier. Flaxseed stocks of nearly 23 million were 7 million below a year ago. Exports of flaxseed, July-December, of nearly 6 million were more than double a year earlier. Crushings of over 11 million bushels were 2.6 million above the same months of 1963. Farmers put 6 million bushels of flaxseed under price support by the end of December as against 10 million a year earlier.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks for 1963 and 1964 are preliminary. October-December 1964 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

GRAINS: MONTHLY AVERAGE CASH PRICES

(All prices in cents per bushel except grain sorghum in cents per cwt.)

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Rye: Supply and distribution, 1958-64

Volume 13 No. 4

Washington, D. C. 20250

January 29, 1965

GRAIN MARKETS HIGHER

Cash grain markets strengthened during the week ended January 28, led by the sharp advance in soybean prices. Price advances of most grains were moderate with generally light trading reported.

Hard winter wheat posted gains of 1-2¢ per bushel with strength stemming in part from announcement of higher export subsidies which were raised 20¢ a bushel on winter wheat from the Gulf and Atlantic ports. Current export demand was discouraged by the dock strike while mill demand was moderate. Country movement continued light. Soft red winter wheat advanced 5¢ per bushel reflecting increased export interest. Spring wheat gained 2-3¢ in light trading. The advance reflected higher export subsidies and higher futures prices. Durum wheat held firm despite increased receipts. White wheat held steady with demand and supply about in balance. Rye went up 3¢ per bushel at Minneapolis reflecting strength in wheat and reaction from previous declines.

Corn prices advanced 1-2¢ per bushel due to the generally good demand. Limited offerings from the country were supplemented by CCC sales as supplies were well absorbed. Oats held steady at Minneapolis reflecting light offerings but were a shade easier at Chicago. Barley was unchanged to lower for both feed and malting types. Offerings were quite heavy. Trading in grain sorghum was light and prices closed unchanged to 1¢ per cwt. lower.

Soybean prices advanced 10¢ per bushel or more during the week but declined 2-3¢ on the last day. The sale of 3.3 million bushels of soybeans to the Soviet Union and active speculation were largely responsible for the advance. Flaxseed held steady in light trading at Minneapolis.

Storage capacity of elevators and warehouses	15
Soybean prices compared with soybean oil and meal prices	16

STOCKS OF WHEAT ... in all positions January 1 totaled 1,443 million bushels. This is 11 percent less than the 1,614 million in store a year earlier and the smallest January 1 holdings since 1958. Of the total stocks 92.4 million were durum as against 79.2 million a year earlier. On January 1 Commodity Credit Corporation owned 711.5 million bushels as against 950.4 million a year ago. CCC holdings of soft red winter and white wheat each totaled less than one-half million bushels this January. Over 510 million bushels were hard winter compared with 756 million last year. CCC owned about 167 million of hard red spring both this year and a year earlier. Of the total durum stocks CCC owned 33 million this year -- an increase of 9 million over January 1, 1964. (Details p. 10-11).

OFF-FARM GRAIN STORAGE CAPACITY ... totaled 5,423 million bushels as of January 1, 1965, according to the Crop Reporting Board. This is somewhat below a year earlier and compares with the record on January 1, 1963 of 5,471 million. The capacity, including all commercial elevators, merchant mills, warehouses and processing plants, totaled 4,993 million on January 1, 1961, the first survey in the current series. Commercial capacity of terminal elevators has been about unchanged for the past five years at 1,104 million bushels. This does not include capacity at flour mills or other processing plants. The capacity of the comparable terminal markets increased from 465 million bushels in 1950 to 793 million in 1956 and 1,095 million in 1960. (Details p. 15).

FOOD FOR PEACE EXPORTS ... under Title I, P. L. 480 reached an all-time high of more than 14 million metric tons in calendar year 1964. Exports of wheat totaled 408.5 million bushels with an additional 41.6 million bushels of wheat flour in grain equivalent. Exports of corn totaled 29.7 million with barley exports amounting to 5.2 million bushels. Exports of soybean oil under Title I amounted to 450 million pounds with an additional 254 million pounds of cottonseed oil.

Grains: Export prices basis prompt or 30-day shipment, January 28, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
-- Dollars --					
Duluth	No. 1 Heavy Northern	:			
	Spring, 14% protein.	1.86	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.70	1.46	3.19	1.32
Gulf	No. 1 Hard Winter:	:

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

MARKET REPORT - URGENT
Grain Market News

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Jan. 1965 ^{2/}	Dec. 1964	Nov. 1964	Jan. 1964
Soybean Oil:					
Average price at crushing plant	Cents per lb.	11.6	12.0	12.0	8.1
Value from bushel of soybeans <u>1/</u>	Dollars	1.28	1.32	1.32	.89
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	68.10	68.00	65.65	77.45
Value from bushel of soybeans <u>1/</u>	Dollars	1.63	1.63	1.58	1.86
Value of oil and meal from bushel of soybeans <u>1/</u>	Dollars	2.91	2.95	2.90	2.75
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.86	2.84	2.74	2.71
Spread between soybean price and value of oil and meal	Cents	5	11	16	4

^{1/} Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

^{2/} Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

SOYBEANS CONTINUE TO ADVANCE

Cash grain markets were again featured by another advance in soybean prices during the week ended February 4. Other grains fluctuated within narrow limits and closed not much different from a week ago. The dock strike continued to depress the market.

Winter wheat held about unchanged from a week earlier, closing not more than 1¢ higher or lower. Limited offerings were well absorbed with only a moderate interest by mills. Demand from exporters reflected disappointing news of the dock strike. Country sales were light. Spring wheat advanced 1¢ in very quiet trading. The unusually cold weather resulted in light receipts with mills providing the main outlet. Durum wheat held steady with a fair demand for smaller supplies. White wheat went up 2¢ per bushel in the Pacific Northwest reflecting improved export interest and sales. Country selling continued slow. Rye advanced 1¢ per bushel despite very slow sales of rye flour.

Corn prices gained 1¢ per bushel at most points. Active export demand and the tight holding by producers kept the market strong in face of large sales by CCC. White corn advanced 5-7¢ reflecting increased need for good milling quality. Oats were unchanged to 1¢ lower reflecting the slow demand for feed. Malting barley gained 4-6¢ at Minneapolis due in part to lighter stocks and increased usage. Prices of feed barley averaged about unchanged. Trading in grain sorghum was light and prices closed unchanged to 1¢ per cwt. lower.

Soybean prices went up 3-5¢ per bushel and closed at the season's high. Strength stemmed in part from strong speculative interest and from the close adjustment in supply and the domestic and export demand. With not much change in oil and meal prices, processors' margins were less favorable. Flaxseed declined early in the week but closed unchanged in very light trading.

Average farm prices, parity and support rates	8

PROPOSED REVISION OF THE U. S. STANDARDS FOR FLAXSEED ... would lower the moisture content permitted in the numerical grades of flaxseed from 11.0 percent to 9.5. It would also reduce the maximum limits for damaged flaxseed from 20 percent to 10 percent in grade No. 1, and from 30 percent to 15 percent in grade No. 2. In addition, the proposal would provide maximum limits for heat-damaged flaxseed of 0.2 percent in grade No. 1, and 0.5 percent in grade No. 2. The proposals to revise the flaxseed standards have been under discussion with the flaxseed industry for more than a year. If the proposed changes are adopted, they would become effective on or about July 1, 1965.

1/ The export payment rate for wheat on February 4, was 44¢ per bushel for spring wheat from Duluth, 39¢ for soft red winter from Baltimore and hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

^{1/} July 1, 1964-January 29, 1965 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1964-January 29, 1965 for corn and soybeans.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of December 31, 1964, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,813,858,175. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$107,802,886. These sales left a combined feed grain certificate net value of \$1,835,268,994 as of January 29, 1965.

Washington, D. C. 20250

February 12, 1965

WHEAT AND SOYBEANS LOWER

Cash grain markets generally declined during the week ended February 11. Soybeans and spring wheat led the decline with rye and oats also lower. Corn and barley were independently firm with prices unchanged to higher.

Winter wheat went down 1-2¢ per bushel due in part to the dock strike which sharply reduced export demand. Domestic mill demand was light reflecting curtailed flour output. Softness was offset in part by the tight holding in the country. Spring wheat dropped 4¢ as small receipts found limited demand. The export outlook was discouraging. Durum wheat was down 6¢ at the low end of the range reflecting large receipts and very slow sales of semolina. White wheat in the Pacific Northwest was 1¢ lower with trading limited. Rye declined 1¢ due in part to increased offerings.

Corn was mostly unchanged to 1¢ higher with continued good industry demand and very light receipts. Export interest was good despite the dock strike. Interest in white corn was active. Oats declined 1-2¢ due to the light buying by mills and feed manufacturers. Barley demand held up well and prices were unchanged to 2¢ higher. Grain sorghum markets weakened reflecting a listless demand and prices were unchanged to 1¢ per cwt. lower.

Soybean prices dropped 8¢ per bushel following the drop in futures. This reflected the fear of the loss in exports due to the dock strike. Crusher demand was affected by unfavorable processor margins and build-up in stocks of oil and meal. Flaxseed gained 3¢ in an effort to increase offerings from the country.

WHEAT AND FEED GRAIN PROGRAM SIGNUPS ... will be February 8 through March 26. Signup for the 1965 Wheat Program in the winter wheat areas took place last August 24 through October 2. At that time 780,916 farms were signed under the Program. Those who signed up in the winter wheat area, as well as those enrolled during the spring wheat and feed grain programs, can change their enrollment intentions at any time prior to March 26, 1965. Program information and details concerning participation and signup are available at all county Agricultural Stabilization and Conservation (ASC) offices. Farmers taking part in the 1965 Wheat and Feed Grain Programs may substitute non-surplus crops on land diverted from wheat and feed grain production. These crops are guar, sesame, safflower, sunflower, castor beans, and flaxseed, plus mustard seed on feed grain acreage. The plantings on wheat cropland can be done only on that acreage diverted below the farm's 1965 effective allotment.

GRAIN INSPECTIONS FOR EXPORT ... during January were down sharply from December and a year ago due to the dock strike on the Atlantic and Gulf ports for the period January 10 to the end of the month.

Grains: Export prices basis prompt or 30-day shipment, February 11, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
--Dollars--					
Duluth	No. 1 Heavy Northern	:			
	Spring, 14% protein..	1.83	-	-	-
Baltimore	No. 2 Soft Red Winter..	1.70	1.47	3.16	1.35
Gulf	No. 1 Hard Winter:	:

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail and truck movement to Canada or Mexico.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

GRAIN MARKETS SLOW

Cash grain markets were slow with prices mostly unchanged to lower for the week ended February 18. While dock workers at most ports had returned to work, the rail embargo was still in effect with considerable congestion at the ports.

Winter wheat held unchanged to 1¢ lower with export demand at a low ebb and mill buying limited to small amounts. Flour business continued quiet. Movement of free supplies was light in reflection of slow farm selling. Spring wheat declined 1¢ per bushel as narrow outlets for flour and weaker millfeed markets discouraged wheat buyers. Durum wheat was down 2¢ as a result of the slow inquiry. White wheat held steady in the Pacific Northwest due to good export interest and slow country offerings. Hard winter wheat was 1-2¢ per bushel higher in this area. Rye declined 1¢ due to lack of demand.

Corn was unchanged to 1¢ lower reflecting in part the slow feeder interest. Exporters provided support with limited purchases. First Feed Grain Signup report showed 5.4 million acres diverted, slightly more than a year earlier. Oats declined 1-2¢ with demand only fair. Barley was unchanged to 2¢ lower despite limited offerings. Grain sorghum markets were slow with ample supplies for the limited buying.

Soybean prices fluctuated sharply during the week but closed not too different from a week ago. Chicago prices were down along with the futures, but Illinois Points prices averaged about the same. Reports of sales to Communist Bloc countries added strength while congestion at ports and back-log of sales were weakening factors. Flaxseed held steady in very light trading at Minneapolis.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN MARKETS MIXED

Cash grain markets followed a mixed trend during the week ended February 25. Hard winter wheat, rye and corn declined while spring wheat and soybeans finished somewhat higher.

Hard winter wheat dropped 1-3¢ per bushel reflecting the limited export demand and restricted mill buying. Flour business was at a low ebb. Much of the winter wheat crop was improved by rain and snow. Farm selling continued light. Soft red winter held steady due to improved export sales. Spring wheat gained 2¢ at Minneapolis due to the very light marketing. Demand was dull. Durum prices were unchanged with limited inquiry and listless trading. White wheat ruled steady on substantial export trading in the Pacific Northwest but hard winter fell 1-2¢ per bushel. Country selling was moderate. Rye declined 2¢ in limited demand for light offerings.

Corn prices were 1¢ per bushel lower at most points with ample offerings and moderate buying, particularly from feed manufacturers and industrial users. Export interest was lagging with congestion at New Orleans and other ports. Oats closed 1-2¢ lower at Chicago but gained 1¢ at Minneapolis where good quality offerings sold readily. Barley markets strengthened with active bidding by both malsters and elevators. Selling was mostly at the top of the range. Grain sorghum prices were unchanged to 1¢ higher with offerings light and only a moderate demand.

Soybean prices declined at the middle of the week but closed 1-2¢ above a week ago. Strength stemmed in part from renewed interest from processors and expected export movement. January crushings of nearly 43 million bushels brought the 4-month total to 174 million this season as against 155 million a year earlier. Flaxseed held steady with very light offerings.

<u>Special Features</u>	<u>Page</u>
Food for Peace Authorizations and Agreements	2
Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, January	6-7
Grains - inspected receipts at selected markets, January	8-9
Barley, barley malt, oats, rye and flaxseed - U. S. exports by country of destination, July-December	10
Soybean prices compared with soybean oil and meal prices	11
Soybeans and flaxseed - supply and distribution, monthly	11
Wheat - supply and distribution, monthly	12

1/ The export payment rate for wheat on February 25, was 41¢ per bushel for spring wheat from Duluth, 40¢ for soft red winter from Baltimore, 32¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyers, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Feb. 1965 2/	Jan. 1965	Dec. 1964	Feb. 1964
Soybean Oil:					
Average price at crushing plant	Cents per lb.	12.1	11.6	12.0	8.0
Value from bushel of soybeans 1/	Dollars	1.33	1.28	1.32	.88
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	70.10	68.30	68.00	74.30
Value from bushel of soybeans 1/	Dollars	1.68	1.64	1.63	1.78
Value of oil and meal from bushel of soybeans 1/	Dollars	3.01	2.92	2.95	2.66
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.95	2.87	2.84	2.65
Spread between soybean price and value of oil and meal	Cents	6	5	11	1

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

Item	Soybeans		Flaxseed	
	Year beginning Oct. 1		Year beginning July 1	
	1964-65	1963-64	1964-65	1963-64

March 5, 1965

GRAIN MARKETS UNCHANGED TO HIGHER

Cash grain markets generally closed on a firm tone with prices unchanged to higher for the week ended March 4. Corn and soybeans advanced while flaxseed declined in slow trading.

Hard winter wheat held about steady at Kansas City but dropped 3¢ at Ft. Worth where offerings outran the domestic demand. Exporters continued on the sidelines as the dock strike remained in effect at Texas ports and the outlook was considered disappointing. Farm selling remained light but fairly large supplies were held by interior elevators. Soft red winter wheat gained 2¢ with a fair demand for light offerings. Spring wheat was fractionally higher with continued light arrivals. Mill demand was good with some improvement in flour business. Demand for durum wheat strengthened and prices advanced reflecting export interest. Durum flour activity was very light. White wheat went up 1¢ in the Pacific Northwest with exporters providing the principal support. Hard winter wheat was down 1¢ due to dull demand. Rye gained 2¢ reflecting light receipts and the firmer tone in other grains.

Corn prices went up 2¢ per bushel at most points as exporters were buying at a good rate and marketing was moderate. Exports last week totaled a record of nearly 20 million bushels. CCC sales were down slightly. Oats gained 1-2¢ reflecting the higher corn price and improved processor demand. Barley advanced 2¢ at Minneapolis despite increased receipts. Prices were unchanged to 1¢ higher on the West Coast. Grain sorghum prices were unchanged but demand improved for light receipts. Export movement was slowed by strikebound Texas ports.

Soybean markets closed on a firm note with prices 1-2¢ per bushel above a week ago. Soybean oil and meal held steady but some processors were reducing crushings because of unfavorable margins. The market was extremely sensitive to export developments for both soybeans and products. Flaxseed declined 2¢ despite increased receipts at Minneapolis.

Grains - CCC dispositions	7
Average farm prices, parity and support rates	8

THIRD REPORT OF 1965 FEED GRAIN PROGRAM SIGNUP ... through February 24, 1965, indicates that 595,398 farms have been signed up as compared to 543,534 during the first 13 days of signup for the 1964 program. Intended diversion of feed grain cropland has reached 14,786,900 acres, while a year ago at the comparable time the total was 13,728,600 acres. (Details on page 6)

U. S. WHEAT STANDARDS AMENDED ... to increase the percentage of "contrasting classes" permitted in all classes of wheat except mixed wheat. The amendment -- to become effective June 15 -- will increase maximum limits of the grading factor, contrasting classes, in grades No. 1, No. 2, and No. 3 from 0.5, 1.0, and 2.0 percent to 1.0, 2.0, and 3.0 percent respectively. The action was taken following an investigation into a claim by the wheat producers of the Pacific Northwest that present limits were too restrictive. According to the wheat growers, this was especially true in areas where wheat of contrasting classes were grown on adjacent fields or where contrasting classes of wheat were alternated on the same field from year to year.

CORN EXPORTS ... hit a record 19.5 million bushels last week, according to inspection records. This is the first full week following the dock strike which ended in most areas exporting corn. Over 14 million bushels were shipped out of the New Orleans and Mobile area with about 5 million from Atlantic ports. Nearly 5 million bushels of corn were shipped to Italy with Netherlands, Japan and United Kingdom each taking around 3 million. With the dock strike still in effect in Galveston and Houston, exports of wheat and grain sorghum have not increased as much as corn.

RESEAL PROGRAM FOR FARM STORED ... 1964-crop wheat, corn, grain sorghum, barley, and oats under price support loans was announced. The resale also will apply to the 1963 and 1962 crops of wheat, corn, and grain sorghum and to the 1963 crops of barley and oats. (Details available from State and County ASC offices.)

Grains: Export prices basis prompt or 30-day shipment, March 4, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein...	1.84	-	-	-
Baltimore	No. 2 Soft Red Winter	1.73	1.47	3.17	1.35
Gulf	No. 1 Hard Winter:				
	ordinary protein	1.75	1.44	3.16	2.22
	14% protein	1.78	-	-	-
Pacific Northwest	No. 2 Western White ..	1.52	-	-	1.19

1/ The export payment rate for wheat on March 4, was 40¢ per bushel for spring wheat from Duluth, 42¢ for soft red winter from Baltimore, 32¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ July 1, 1964-February 26, 1965 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1964-February 26, 1965 for corn and soybeans.

2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of January 31, 1965, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,831,132,769. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$171,560,090. These sales left a combined feed grain certificate value of \$1,788,786,384 as of February 26, 1965.

March 12, 1965

GRAIN MARKETS MIXED

Cash grain markets followed a mixed trend during the week ended March 11. Corn, oats and soybeans continued to advance while soft red winter wheat and feeding barley declined. Other grains showed little change.

Hard winter wheat was moderately stronger at the close with prices fractionally higher. The domestic market was supported by meager farm selling and light terminal receipts. Weakness in the export market stemmed from pessimism over the loss of considerable overseas business and the prolonged delay in relieving the boxcar shortage and port congestion. Crop prospects were good in most sections on March 1 except in the critically dry areas of eastern Colorado, western Kansas and the Panhandles of Texas and Oklahoma. Soft red winter wheat declined 2-4¢ per bushel reflecting in part the slow export interest. Spring wheat was unchanged for the higher proteins but 2¢ lower for ordinary types. In spite of light receipts demand was only fair. Flour production decreased and export interest was nominal. A moderate demand for durum wheat held prices steady at last week's level. White wheat declined 1¢ in the Pacific Northwest with increased marketing. Export sales were slow but movement for export was heavy. Rye advanced 1¢ in very light selling at Minneapolis.

Corn prices were mostly 2¢ per bushel above a week ago with corn marketing extremely light. Exports continued heavy and buying for export was active. Domestic interest was moderate. Oats advanced 2¢ with offerings somewhat short of the moderate demand. Malting barley held steady at Minneapolis with good demand for light receipts. Feed barley declined 1-4¢ per bushel. Grain sorghum held steady at Kansas City reflecting short supplies but closed 2¢ lower at Ft. Worth where demand was dull.

Soybeans advanced 1¢ per bushel reflecting moderate processor interest and expected improvement in exports. Oil prices improved slightly while meal generally held steady. Soybean marketings continued light. Flaxseed held steady with very light offerings and prices remained unchanged at Minneapolis.

FEED GRAIN PROGRAM SIGNUP ... on the basis of the fourth report, showed 766,423 farms listed whose operators plan to divert 19,128,500 acres from production of feed grain during the current crop year. This enrollment at mid-point of the 1965 signup is 59 percent of the final enrollment of 1.3 million for the 1964 program.

WHEAT PROGRAM SIGNUP ... indicate 810,629 farms will participate in the 1965 program, on the basis of the third report. The acreage diversion through March 4 totaled 6,136,000 acres.

Food for Peace Authorizations, February 26-March 10, 1965

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
India	Feb. 26	39-148	Wheat 1/	200,000	11,207

1/ White, hard red spring, hard red winter, and mixed wheat.

2/ Soft red winter, hard red spring, hard red winter, and mixed wheat.

3/ Soft red winter, white, and mixed wheat.

4/ White wheat.

Grains: Export prices basis prompt or 30-day shipment, March 11, 1965

(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/	Corn	Soybeans	Barley
	Grade	No. 2	No. 2	or Grain
		Price	Yellow	Yellow
			Sorghum 2/	
		--Dollars--		
Duluth	No. 1 Heavy Northern			
	Spring, 14% protein	1.83	-	-
Baltimore	No. 2 Soft Red Winter	1.70	1.48	3.19
				1.35
Gulf	No. 1 Hard Winter:			
	Ordinary protein	1.74	1.45	3.19
	14% protein	1.77	-	-
Pacific Northwest	No. 2 Western White	1.52	-	-
				1.19

1/ The export payment rate for wheat on March 11, was 40¢ per bushel for spring wheat from Duluth, 39¢ for soft red winter from Baltimore, 32¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

1/ Transshipments of U. S. wheat from Canadian ports have been subtracted from the quantity shipped to Canada in order to show the final country of destination for all U. S. wheat exported from the United States as well as from Canadian ports. If the shipments to Canada are larger than transshipments of U. S. wheat from Canada, the difference is added to the total inspections for export for the period. If shipments are smaller than transshipments, the difference (which indicates a reduction in U. S. wheat stocks in Canada) is subtracted from total inspections for export.

Note: Dock strikes at the Gulf and Atlantic ports in 1963 and 1965 adversely affected exports of grain - particularly wheat, corn, grain sorghum and soybeans. The dock strike in 1963 began late in December and ended late in January while in 1965 the strike began January 10 and ended at most ports the middle of February and the remainder on March 7.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

GRAIN MARKETS SHOW MIXED TREND

Cash grain markets featured a sharp drop in soybean prices and a downturn in wheat during the week ended March 18. Price changes for other grains worked within narrow ranges.

Winter wheat finished 1-5¢ per bushel lower. Demand for hard winter wheat failed to keep pace with the increase in offerings. Sellers offered more freely but domestic mill buyers were conservative and export interest was narrow. While soft red winter wheat offerings were still scarce and there was talk of new export business, overall export demand remained disappointing. Spring wheat was off 2¢ but durum held steady. Durum enjoyed a good demand but spring wheat found only moderate interest from both mills and exporters. White wheat ruled firm in the Pacific Northwest as exporters were stocking short positions for committed sales and country selling was slow. Rye declined a penny in limited trading at Minneapolis.

Corn stood unchanged to 2¢ per bushel higher. Active export buying provided the main support, but commercial users and elevator interests also competed for the rather tight offerings from the country. Oats were not much changed in limited trading. Barley held mostly steady behind good demand but some lower qualities sold as much as 4¢ lower at Minneapolis. Grain sorghum prices maintained a firm position even though feed manufacturers appeared to hold ample stocks.

Soybean prices fell 12-13¢ per bushel. Spot demand was good and last week's export inspections were large, but these were offset by trade interpretations of statistical data, sluggish oil and meal markets early in the week, the outlook for foreign demand, and considerable selling and profit taking on the futures market. Flaxseed lost 4¢ in Minneapolis, reflecting the lower soybean market and talk of curtailing the crush.

Grains - quantity under price support	16

CORRECTION: Grain Market News, dated March 12, 1965, Page 6 Title I, Pac. should have included white wheat to India 3,875 and Pakistan 2,244. Subtotal now reads hard red spring 0, hard red winter 2,532, soft red winter 1,383, white 6,119, durum and mixed 0, total 10,034. (In 1,000 bushels).

PRICE SUPPORT ACTIVITIES ... through February 28 show that farmers put 200.6 million bushels of 1964-crop corn under price-support loans. This is the smallest quantity put under loan by this date since 1955, and compares with 356.2 million put under at the same date a year ago. Farmers put 192.7 million bushels of wheat under price support as against 160.5 million a year earlier. Only 28.6 million bushels of 1964-crop soybeans had been put under support as against 69.6 million from the 1963 crop by the end of February. Under a simplified price support program, effective with the 1964 crop, farmers can estimate total eligible production upon which they may wish to obtain price support. The closing date was January 31, 1965 for all grains except corn, which is May 31. Under this system producers can seek price support loans, based on their applications, until 30 days prior to loan maturity dates. Producer applications for price support loans and purchases by the end of February were as follows in million bushels: Wheat 293.0; corn 331.0; barley 26.0; flaxseed 8.9; oats 69.6; rye 8.3; soybeans 39.1 and grain sorghums 60.1 million cwt. Farmers had repaid loans on 38.3 million bushels of wheat and 8.2 million bushels of soybeans. (Details by States, p. 8-16).

Grains: Export prices basis prompt or 30-day shipment, March 18, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley

Duluth	No. 1 Heavy Northern				
	Spring, 14% protein...	1.81	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.70	1.49	3.07	1.35
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.72	1.46	3.08	2.22
	14% protein	1.75	-	-	-
Pacific Northwest	No. 2 Western White ...	1.52	-	-	1.18

^{1/} The export payment rate for wheat on March 18, was 37¢ per bushel for spring wheat from Duluth, 37¢ for soft red winter from Baltimore, 31¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

March 26, 1965

GRAIN MARKETS STRENGTHEN

Cash grain markets showed a firm to higher trend during the week ended March 25. Soybeans advanced a nickel to recover part of the previous week's loss. Other grains closed unchanged to generally no more than a cent or two higher.

Winter wheat finished steady to a penny higher at most markets but advanced 2-4¢ per bushel at Kansas City. Moderate offerings of hard wheat found improved buyer interest from flour mills, but export demand lagged. The red wheat market was quiet. Cold weather delayed progress of winter wheat crops and the opening of overall river barge traffic. Spring wheat went up 1-3¢ reflecting a little broader demand. Durum held steady. White wheat prices softened in the Pacific Northwest where export business continued small while selling of wheat redeemed from loan was quite heavy. Rye was firm at Minneapolis as the lack of export interest continued to plague the market.

Firmness in corn was attributed to the failure of marketings to keep up with demand. Oats were about unchanged in light trading. Barley markets were mostly steady but both the No. 3 and malting barley edged up a couple of cents behind quite broad and strong demand at Minneapolis. Grain sorghum showed little change with offerings ample for light demand.

Soybean markets recovered somewhat from last week's losses and moved up 5¢ per bushel this week. Cash demand was strong. This and favorable export and crushing figures helped to offset the weakening influence of prospects for record plantings this year. Strength in soybean oil and meal also added support to the cash market for soybeans. Flaxseed held steady at Minneapolis.

Soybeans and flaxseed - supply and distribution, monthly	11
Food for Peace Authorizations and Agreements	11
Grains - prospective U. S. plantings for 1965	12

FIFTH REPORT ON 1965 WHEAT PROGRAM SIGNUP ... shows that through March 18 participants on 849,052 farms intend to divert 6.8 million acres from wheat production. Enrolled farms have effective allotments totaling 78 percent of the national total of 53,240,632 acres allocated to all eligible farms. Signup for the program extends through March 26 except in certain counties where the signup period has been extended to April 2 because of severe weather conditions.

SIXTH REPORT ON 1965 FEED GRAIN PROGRAM SIGNUP ... indicated that through March 18 producers on 1,116,128 farms intend to divert 27,861,500 acres from production of feed grains this crop year. The 1.1 million farms signed up thus far represent 86 percent of last year's final total of 1.3 million, while the intended diversion of 27.8 million acres this year is 81 percent of the 34.3 million acres of agreed diversion for 1964.

WHEAT-FEED GRAIN PROGRAM SIGNUP HAS BEEN EXTENDED ... by one week in certain counties because of severe weather conditions. Where ASC State committees determine such an extension is necessary, farmers in specified counties are to get time through Friday, April 2, in which to file their participation intentions at ASCS county offices. In all other counties the enrollment period closes March 26.

CCC WHEAT SALES FOR DOMESTIC USE ... have been suspended until further notice. CCC wheat sales for domestic unrestricted use have been small in recent months and stocks now in producers' hands or in commercial channels are ample to meet needs. Sales will be resumed when and if it appears desirable to provide supplies for market needs at reasonable and stable prices.

Grains: Export prices basis prompt or 30-day shipment, March 25, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein..	1.83	-	-	-
Baltimore	No. 2 Soft Red Winter..	1.71	1.49	3.12	1.34
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.71	1.46	3.13	2.22
	14% protein	1.74	-	-	-
Pacific Northwest	No. 2 Western White ..	1.52	-	-	1.18

1/ The export payment rate for wheat on March 25, was 39¢ per bushel for spring wheat from Duluth, 38¢ for soft red winter from Baltimore, 31¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

April 2, 1965

GRAIN MARKETS MIXED

Cash grain markets showed mixed trends for the week ended April 1. Soybeans advanced sharply. Wheat turned downward. Other grains registered little price change in either direction.

Winter wheat closed 1-4¢ per bushel lower. Selling by farmers remained light, but offerings proved ample for limited buying by mills and exporters. Prolonged winter weather continued to delay crop growth. Spring and durum wheat prices softened as receipts were quite large, flour and semolina sales lagged, and export business was slow. White wheat held about steady in the Pacific Northwest where trading was dull. Country selling dropped off, but exporters showed little interest in view of limited foreign sales. Rye declined a couple of cents as export interest was lacking and supplies were burdensome.

Corn fluctuated within a narrow range and finished no more than 2¢ per bushel higher or lower. Demand was active, particularly on the part of exporters, and spot offerings remained on the light side as a rule. Oats looked firm, supported mainly by growing concern about the lateness of spring planting due to cold weather. Barley continued to show a strong undertone, reflecting large exports and overall disappearance and smaller prospective plantings this year. Grain sorghum edged up a cent or two with fairly light offerings well absorbed.

Soybeans advanced 8¢ per bushel, largely reflecting upturns in the soybean oil market. Other influences in the spot market were trade interpretations of crushing ratios, export figures, and action in the futures markets for soybeans as well as soybean meal and oil. Flaxseed held steady at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Average farm prices, parity and support rates	6
Soybean prices compared with soybean oil and meal prices	6
1965 Feed Grain Program - seventh signup report	7
Food for Peace Authorizations	8

TERMINAL AND COUNTRY PRICE SUPPORT RATES FOR 1965-CROP RYE ... were announced this week. New rates reflect the 1965-crop national average support price of \$1.02 per bushel for rye grading No. 2 or better, or grading No. 3 on the factor of test weight only. For major rye-producing areas, county rates will continue to reflect terminal rates less the freight and handling charges needed to get the rye to terminal markets. Price support will be carried out as in previous years, through farm- and warehouse-stored loans and purchases. Loans will mature in most States on April 30, 1965.

SEVENTH REPORT ON 1965 FEED GRAIN PROGRAM SIGNUP ... shows that new records are being set in this year's signup. On the basis of almost complete State returns through March 25, the program has 1,378,138 producers signed up -- 41,000 more than the previous record set in 1962. Agreed acreage diversion on signed farms totals 34.1 million acres, or within 1 percent of last year's 34.3-million-acre record. Base acreage on enrolled farms also is at a new high of 79.8 million acres compared with the 77.7-million-acre record set in 1964.

SIXTH REPORT ON 1965 WHEAT PROGRAM SIGNUP ... indicates that through March 25 a total of 877,257 wheat producers had enrolled in the program. This exceeds the 1962 record year enrollment of 820,079 producers. Effective allotments of 43,736,138 acres on enrolled farms reflected 82 percent of the national total -- exceeding the record set in 1962. The cumulative agreed wheat acreage diversion of 7,320,125 acres is composed of 4,859,087 acres reduction needed to participate in the 1965 program, and 2,451,308 acres intended additional voluntary diversion below the allotments.

Grains: Export prices basis prompt or 30-day shipment, April 1, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein...	1.82	-	-	-
Baltimore	No. 2 Soft Red Winter...	1.68	1.50	3.18	1.35
Gulf	No. 1 Hard Winter: Ordinary protein 14% protein	1.70 1.73	1.47 -	3.19 -	2.19 -
Pacific Northwest	No. 2 Western White ...	1.52	-	-	1.18

1/ The export payment rate for wheat on April 1, was 38¢ per bushel for spring wheat from Duluth, 36¢ for soft red winter from Baltimore, 31¢ for hard winter from the Gulf, and 27¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Soybeans	2.85	2.81	2.55	3.01	95		2.25	2.25	2.25

^{1/} Payment-in-kind rates for 1964-crop are included as follows: Corn 15¢, barley 12¢ per bushel, grain sorghum 23¢ per cwt.; 1963-crop wheat and corn 18¢, barley 14¢ per bushel, grain sorghum 29¢ per cwt.; 1962-crop none.

^{2/} Does not include 70¢ per bushel domestic marketing certificate and 25¢ per bushel for export marketing certificate.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Mar. 1965	Feb. 1965	Jan. 1965	Mar. 1964
Soybean Oil:					
Average price at crushing plant	Cents per lb.	12.1	12.1	11.6	8.0
Value from bushel of soybeans ^{1/}	Dollars	1.33	1.33	1.28	.88
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	68.50	70.00	68.30	73.70
Value from bushel of soybeans ^{1/}	Dollars	1.64	1.68	1.64	1.77
Value of oil and meal from bushel of soybeans ^{1/}	Dollars	2.97	3.01	2.92	2.65
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.94	2.95	2.87	2.63
Spread between soybean price and value of oil and meal	Cents	3	6	5	2

^{1/} Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Volume 13 No. 14 Washington, D. C. 20250 April 9, 1965

GRAIN MARKETS LITTLE CHANGED

Cash grain prices continued to show mixed trends for the week ended April 8. Wheat and corn registered minor changes in both directions. Barley strengthened, while other grains closed mostly on a firm note.

Winter wheat prices softened in the Southwest but held mostly steady elsewhere. Offerings were adequate for light demand from both domestic mills and exporters. Nearness of new-crop harvesting in early producing areas had a weakening influence on the cash market. Warmer weather promoted crop growth in many areas. Spring wheat declined 2-3¢ per bushel and durum was unchanged to 3¢ lower at Minneapolis. The flour market remained draggy, and mills were not aggressive buyers. White wheat went up 2¢ behind aggressive export demand in the Pacific Northwest. Farmers, however, remained tight sellers. Rye weakened as flour sales continued slow and exports were still lacking.

Corn prices edged up around a cent per bushel at Chicago but ruled steady to a cent or two lower elsewhere. Selling by farmers continued light and spot demand was good. Oats were not much changed with good demand for light offerings. Barley advanced 1-4¢ per bushel, reflecting strong demand from malsters and other users. Grain sorghum prices showed little change in quiet trading.

Soybeans fluctuated in line with action of the futures market and closed unchanged to 3¢ per bushel higher. Light offerings found good demand. The spot market was sensitive to all news items and statistical interpretations of export and crush figures. Some buyers took to the sidelines while awaiting the release of stocks on farms. Flaxseed held steady at Minneapolis.

Grains - inspections for export by ports and areas, March	11
Corn, grain sorghum and soybeans - inspections for export by grades, October 1964-March 1965	12-13
Grains - CCC dispositions	14
Grains - United States exports, February	15
Grains - United States imports, February	15
Wheat - supply and distribution, monthly	16

CORN EXPORTS ... totaled a record 67 million bushels during March on the basis of inspections. This is about double the 33.7 million exported in March 1964 and well above February. Corn exports October-March total 260 million this season as against 258 million the first half of last season. Wheat exports in March were nearly triple those of February with the total, including flour in grain equivalent, amounting to 73 million bushels. This is well below the 90 million exported in March 1964. The July-March total is now 510 million compared with 623 million the same months of 1963-64.

Food for Peace Authorizations, April 2-8, 1965

Grains: Export prices basis prompt or 30-day shipment, April 8, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u> Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.80	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.67	1.48	3.19	1.35
Gulf	No. 1 Hard Winter: Ordinary protein	1.70	1.45	3.20	2.17
	14% protein	1.73	-	-	-
Pacific Northwest	No. 2 Western White ...	1.53	-	-	1.20

1/ The export payment rate for wheat on April 8, was 37¢ per bushel for spring wheat from Duluth, 35¢ for soft red winter from Baltimore, 31¢ for hard winter from the Gulf, and 28¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

1/ July 1, 1964-April 2, 1965 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1964-April 2, 1965 for corn and soybeans.

2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of February 28, 1965, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,832,064,535. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$229,644,999. These sales left a combined feed grain certificate value of \$1,731,633,241 as of April 2, 1965.

MOST GRAINS ADVANCE

Prices of most cash grains, except soybeans, showed a firm to higher trend for the week ended April 15. Soybeans turned downward.

Wheat markets finished mostly 2-3¢ per bushel higher. Trading was spotty as demand continued on the slow side. There was some increase in selling by farmers and interior elevators but movement was hampered by the boxcar shortage. More liberal offerings of white wheat found fairly good export demand in the Pacific Northwest. Rye advanced 3-4¢ on a sharp cutback in offerings at Minneapolis.

Corn prices ruled firm at most market but weakened at Minneapolis. Demand remained good as a rule, but the delay in the opening of the shipping season on the Great Lakes and some rivers created a cautious attitude in some buyers. Oats went up 3¢, bolstered by good demand, light offerings, and weather-delayed seeding. Barley markets held a firm position. Grain sorghum closed mostly unchanged as light offerings continued to find good demand.

Soybean prices dropped 3-6¢ per bushel. The downturn was attributed by many traders to the general disappointment in the reaction to the small farm stocks reported last week and to the light volume of new export sales. Some buyers held up to await next week's report of stocks in all positions so they could get a better idea of the supply picture for the balance of the year. Flaxseed held steady at Minneapolis.

USDA WILL BUY WHEAT PRODUCTS WITH CASH OR EXPORT COMMODITY CERTIFICATES...in future purchase requests under which wheat flour, rolled wheat, and bulgur are obtained for domestic and foreign donation. Processors may select either method of payment when they submit their invoices under future purchase announcements. For the past few months, payment to processors for the purchase of wheat flour, rolled wheat, and bulgur have been made only in Export Commodity (payment-in-kind) Certificates.

PRELIMINARY FINAL REPORT ON 1965 WHEAT PROGRAM ... showed that a record 889,778 farmers agreed to participate in the voluntary program. The 44,746,080 acres in effective allotments on enrolled farms also represented a new record. Agreed diversion from production of wheat in 1965 totals 7.5 million acres. In relation to the 1964 program, the number of farms enrolled for 1965 is 45 percent more; effective allotments on signed farms are 10 percent larger; and intended additional diversion is nearly three times greater.

MARKETING QUOTA AND ALLOTMENT FOR 1966-CROP WHEAT ... were proclaimed this week as required under provisions of wheat legislation now in effect. A national wheat marketing quota of 1,292,000,000 bushels and a national allotment of 47.8 million acres were proclaimed for the 1966 crop of wheat. This proclamation was required to be issued prior to April 15, 1965, in the absence of new legislation for the 1966 crop year. Current law requires a marketing quota proclamation whenever wheat supplies are apt to be excessive without a quota. In making this determination, total supplies, made up of a 1966 crop without quotas or other program, plus the carryover, would exceed utilization by 1,128,000,000 bushels, which would be excessive. In the absence of new legislation for the 1966 crop, a referendum would be held by law prior to August 1, 1965, to determine whether or not wheat farmers favor or oppose marketing quotas for 1966.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Grains: Export prices basis prompt or 30-day shipment, April 15, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade		No. 2	No. 2	or Grain
			Yellow	Yellow	Sorghum <u>2/</u>
			--Dollars--		
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein..	1.83	-	-	-
Baltimore	No. 2 Soft Red Winter..	1.71	1.49	3.15	1.35
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.70	1.46	3.17	2.17
	14% protein	1.73	-	-	-
Pacific Northwest	No. 2 Western White ..	1.57	-	-	1.21

1/ The export payment rate for wheat on April 15, was 39¢ per bushel for spring wheat from Duluth, 36¢ for soft red winter from Baltimore, 31¢ for hard winter from the Gulf, and 28¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Public Law 480 Agricultural Trade Development and Assistance Act of 1954:

Title I - Sales for local currency pursuant to formal government-to-government agreements.

Title II - Government-to-government donation.

Title III Barter contracts for exchange of CCC-owned commodities for strategic materials.

Title III Donation and Sec. 416 of Agr. Act of 1949 as amended - Donations to the needy of foreign countries through private U. S. relief and charity agencies.

Title IV - Agreements for long-term credit repayable in dollars.

Public Law 665 Sec. 402 - Agency for International Development and Mutual Security Agency programs.

Cash or "dollar" sales consist of total exports as reported by U. S. Bureau of the Census less shipments made under government programs.

1/ Preliminary. Includes bulgur and rolled wheat.

2/ Flour includes durum flour, semolina, macaroni and macaroni products in grain equivalent.

Foreign Agricultural Service.

April 23, 1965

GRAIN MARKETS MIXED

Cash grain markets followed a mixed trend during the week ended April 22. Winter wheat, rye, and soybeans registered losses, while other grains held steady or strengthened.

Winter wheat finished 1-5¢ per bushel lower. Losses were attributed to nearness of the new crop, larger offerings, and little demand on the part of both domestic mills and exporters. Warm weather continued to favor crop growth in the major hard wheat producing areas. Spring wheat edged up a penny but durum held steady. Mill demand was fairly strong even though flour trade was limited to some fill-in business. White wheat prices softened and selling by farmers dropped off in the Pacific Northwest. Rye lost 4¢ at Minneapolis with the downturn reflecting light exports and large supplies.

Cash corn closed on a mixed note but weakness at a couple of major markets was more than offset by strength at most points. Demand was strong, particularly from exporters. Some traders expressed concern over what effect spring floods would have on barge movement both down river and to Great Lakes ports. Oats ruled steady to 1¢ lower in a dull market. Barley markets were firm behind good demand. Grain sorghum markets also looked firm as light offerings met fairly good demand.

Soybeans continued their downward trend and closed 2-3¢ per bushel lower. Trading was on the quiet side. Both buyers and sellers remained on the sidelines while analyzing export inspections and crushing data and more generally awaiting the report of stocks in all positions. Flaxseed remained unchanged at Minneapolis.

Special Features

	<u>Page</u>
Grains - export prices at specified points	2
Grains - U. S. stocks by position, April 1	6
Grains - CCC-owned stocks by States, March 31	7-9
Wheat - CCC-owned stocks by classes, March 31	10
Food for Peace Authorizations	10
Wheat - supply and distribution in four exporting countries	11

EMERGENCY FEED PROGRAM ... was extended for a 30-day period in 165 counties of nine States because of feed shortages, involving inadequate moisture in some areas and seasonally late spring pasture growth in others. The States in which farmers in designated counties may continue through June 30 to purchase government-owned feed at reduced prices are: Connecticut, Maine, Massachusetts, Michigan, Minnesota, New Hampshire, New York, Vermont, and Wisconsin. The program was to have ended in these States May 31.

EXPORT RATES FOR FLAXSEED AND LINSEED OIL ... were announced under the flaxseed and linseed oil export payment-in-kind program released February 1 (press release USDA 317-65). The rates fixed for sales registered with USDA not later than 3:30 p.m. April 23 were 13 cents per bushel for flaxseed and 9/10 of a cent per pound for linseed oil. Export rates will be announced daily for flaxseed and linseed oil in order to maintain exports by keeping prices competitive with world prices.

OFFERS TO PROCESS BULGUR ... from privately-owned hard red winter or hard red spring wheat, were requested April 19. Of the total quantity requested for sale to CCC, 27,610,982 pounds are for foreign donation and 50,016 pounds for domestic donation. This is the first purchase request under which processors of bulgur, whose bids are accepted, can be paid either in cash or Export Commodity (payment-in-kind) certificates, as announced April 14 (press release USDA 1172-65). So far, a total of 100.5 million pounds have been obtained under the first three requests for offers. Bulgur is processed by boiling wheat, drying it, removing some of the bran, and cracking the grain into meal.

Grains: Export prices basis prompt or 30-day shipment, April 22, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum ^{2/}
			--Dollars--		
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein.	1.84	-	-	-
Baltimore	No. 2 Soft Red Winter	1.68	1.50	3.13	1.35
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.67	1.47	3.15	2.17
	14% protein	1.70	-	-	-
Pacific Northwest	No. 2 Western White ...	1.56	-	-	1.20

^{1/} The export payment rate for wheat on April 22, was 40¢ per bushel for spring wheat from Duluth, 35¢ for soft red winter from Baltimore, 29¢ for hard winter from the Gulf, and 23¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Volume 8 No. 2

Washington, D. C. 20250

April 27, 1965

Grain prices followed a mixed trend during the January-April period with soybeans, corn and barley advancing while wheat, rye and flaxseed declined. Grain prices in April were well above a year ago with the exception of wheat and rye. Stocks of feed grains on April 1 were 13 percent less than last year reflecting smaller holdings of each of the four feed grains. Wheat stocks were down 5 percent from a year earlier while soybeans in storage declined 8 percent from the record high of a year ago.

WHEAT ... prices generally declined in the January-April period reflecting in part the loss of exports during the dock strike in January and February. However, world prices declined with smaller exports and ample supplies from the record 1964 wheat crop. Hard winter wheat dropped 5-8¢ per bushel during the 4-month period while soft red winter held steady to 3¢ lower. Spring wheat lost 4¢ on the lower proteins and only 1¢ on the higher proteins. With no strike on the West Coast and a good export outlet to Japan, soft white wheat gained 3¢ at Portland from January to April. Stocks of wheat in all positions, April 1, totaled 1,146 million bushels -- 60 million less than a year ago. Of the total stocks, Commodity Credit Corporation owned 641 million, a drop of 257 million from last year. An additional 188 million were outstanding under support or resale, leaving around 317 million bushels of free wheat. This compares with 167 million at the same time a year ago. Exports of wheat and flour, July through March, totaled 510 million bushels -- a drop of 113 million from the record for these months last season. Milling of wheat for flour totaled 430 million the first nine months, about 7 percent less than a year ago. Canadian stocks of wheat on March 31 totaled 717 million bushels compared with 785 million a year earlier. Wheat exports from United States, Canada, Argentina and Australia, July through March, totaled around 1.1 billion bushels. While this is nearly 200 million less than last season it is 300 million more than in the same period of 1962-63.

RYE ... prices showed little change in a depressed market during the January-April period. Minneapolis prices this season averaged 18¢ below a year ago due in part to larger supplies and very limited export interest. Stocks of 17.3 million bushels on April 1 were 6.5 million more than a year ago. Over 5 million bushels of rye remained under price support on March 31 -- ten times that of a year ago. Exports in the January-March quarter totaled only 0.1 million bushels as against 2.7 million in the same months of 1964. Usage for alcohol and for milling were up slightly from last year's level. The quantity of rye remaining for feed at 9.1 million was sharply above last year and the average.

CORN ... prices at the farm, January through March, averaged 8¢ per bushel above last year due in part to smaller supplies but also to the continued heavy exports. Market prices advanced 2¢ in April and averaged about 8¢ above

April 1964. Stocks of corn in all positions on April 1 totaled 2,836 million -- 466 million less than a year ago. CCC owned 693 million on April 1 as against 778 million a year earlier. Farmers put only 208 million bushels of 1964-crop corn under price support by the end of March -- the smallest quantity in 10 years. Disappearance of corn the first half of the season at 2,223 million was about 90 million above last year. Exports of 261 million the first six months are about the same as last year's record despite a strike lasting over a month. About 97 million bushels of corn were used for wet milling -- only slightly less than a year ago. Corn remaining for feed totaled 1,848 million -- 83 million above a year earlier. Animal units for 1964-65 are estimated at 168.4 million compared with 172.2 million for 1963-64. Feeding of corn per animal unit totaled 11.0 bushels the first half of the season as against 10.3 last year.

OATS ... prices declined in February but by the middle of April had recovered the loss and averaged about the same as the beginning of the year. Market prices in April were mostly 4¢ per bushel above April 1964. Stocks in all positions on April 1, totaled 473 million -- the smallest since 1948. Disappearance, mainly for feed, July through March, totaled 726 million -- 14 million below the same period last year and the smallest in 25 years of record. Exports of 3 million were one million below the same months last season. Canadian stocks of oats, March 31, totaled 241 million this year as against 303 million last year.

BARLEY ... prices generally advanced during the January-March period with the farm average 6¢ per bushel above a year earlier. Market prices in April made further gains and at Minneapolis averaged 18¢ per bushel above a year ago. Prices on the West Coast in April were at about last year's level. Barley stocks in all positions April 1 totaled 205 million bushels -- 28 million less than last year. Disappearance of 340 million bushels, July through March, was 15 million more than last year reflecting mainly increased feeding. Exports of 38 million were 5 million less while industrial use, mainly malt liquors, increased by 3 million. Stocks of Canadian barley, March 31, totaled 172 million -- 28 million less than a year ago.

GRAIN SORGHUM ... prices at the farm averaged 19¢ per cwt. higher than a year ago for the first three months of the calendar year. Market prices in April averaged 12-15¢ per cwt. above April 1964. Stocks of 431 million cwt. were 40 million less than a year earlier. Of the total stocks, CCC owned 309 million cwt. with an additional 61 million under loan or resale. Exports of 31 million cwt. the first half of the season were around 3 million less than a year earlier. The quantity remaining for feed at 174 million cwt. October through March, was 14 million less than for the same months of 1963-64.

SOYBEAN ... prices advanced 12¢ per bushel during the January-April period and in April averaged 45¢ per bushel above a year ago. The higher prices reflect the record crushings and exports. Stocks of 347 million bushels were 30 million less than a year ago. Crushings of 253 million the first six months compare with 223 million the same period last season. Exports of 120 million were 10 million more than a year earlier despite the prolonged dock strike. By the end of March farmers had put only 29 million bushels under price support of which 11 million had been repaid. This compares with 73 million put under a year earlier with 5 million repaid.

FLAXSEED ... prices declined 4¢ per bushel during the first four months of the calendar year. Despite the loss prices in April averaged 4¢ above a year ago. Stocks of flaxseed totaled 17.6 million bushels on April 1 as against 24.2 million a year earlier. Exports of flaxseed, July through March, at 5.9 million were somewhat above the 2.5 million exported last season. Crushings of flaxseed totaled 16.7 million -- 2.8 million more for the same period a year ago.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Rye: Supply and distribution, 1958-65

Flaxseed	12,361	-	2,634	14,995	24,232	62

1/ Quantity of current crop placed under support minus the quantity of loans repaid.

2/ Quantity of previous crops outstanding under resale programs.

3/ Total grain in all positions as reported by Crop Reporting Board.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports, quantity milled or processed from Census Bureau; and alcohol usage from Internal Revenue Service. Production and stocks are preliminary. January-March 1965 data are partly estimated. Since the statistics are preliminary and subject to revision and represent data reported by several independent sources, no attempt is made to force a balance between supply and reported disappearance.

WHEAT AND SOYBEANS DOWN - OTHER GRAINS LITTLE CHANGED

Wheat and soybean prices lost ground during the week ended April 29. Flaxseed turned upward, while most other grains registered little or no change in either direction.

Winter wheat continued on a downward trend and closed 1-7¢ per bushel lower. The market was under pressure from enlarged receipts and the lack of buying on the part of both mills and exporters. Offerings increased as selling by farmers, country and sub-terminal elevators, and merchandisers picked up. Nearness of the new crop also was a weakening influence. Spring wheat declined a penny and durum held steady. Demand for spring wheat was fairly strong but buyers did not advance their bids. Export business was lacking. White wheat lost a couple of cents in the Pacific Northwest as export business slowed, while country selling continued at a good pace. Rye held steady at Minneapolis.

Corn prices fluctuated within a narrow range and closed no more than a penny higher or lower. Exporters provided the bulk of a continued strong demand. Oats went down 2-3¢ largely as a result of good progress in spring seeding. Barley markets were mostly unchanged but good demand from malsters and strong export buying created some firmness in the overall picture. Grain sorghum prices went up 1-2¢ per cwt. behind a better demand from feeders.

Soybean prices sagged, closing 11¢ per bushel lower at Chicago and 7¢ lower at Minneapolis. The cash market had a very nervous undertone and was highly susceptible to action in the futures market. Processors, although well supplied with soybeans, remained ready buyers. Most traders, however, busied themselves making interpretations and projections of stocks, export, and end-product statistics. Flaxseed advanced 4¢ reflecting the smaller stocks on hand in all positions than a year ago.

Special Features

Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, March	6-7
Grains - inspected receipts at selected markets, March	8-9
1965 Wheat Program - preliminary final signup report through April 1, 1965	10
1964 Wheat - quantity owned by CCC by classes, by States, as of March 31, 1965	11
Soybean prices compared with soybean oil and meal prices	12

SOYBEAN STOCKS ... totaled 346,882,000 bushels as of April 1 according to a revised report issued April 26. The off-farm position for Minnesota reported at 14,195,000 bushels should be 23,590,000 bushels.

WHEAT AND FLOUR EXPORTS ... totaled 1.1 billion bushels from the four principal exporting countries (United States, Canada, Argentina and Australia) during the period July 1964 through March 1965. This is 160 million less than the record exports for the same period last season but 300 million more than for the same months of 1962-63. The sharp drop in exports reflects a record world wheat crop, estimated at 9,170 million bushels for 1964. This compares with 8,315 million produced in 1963 and the previous record of 8,760 million in 1962. Exports of wheat and flour, in grain equivalent, July through March, in million bushels this season with comparable figures for last season in parentheses: United States 510 (623); Canada 330 (373); Argentina 117 (72); Australia 157 (207).

FEED GRAIN PROGRAM SIGNUP ... showed 1,489,222 farms enrolled for the acreage diversion payments at the close of the signup period. This is 11 percent over the previous record in 1962 and 14 percent above the 1964 signup. The acreage diversion now totals 36,722,900 acres. The eight States which lead in corn production have 67 percent of their corn base acreage on signed farms. Almost 88 percent of the sorghum base acreage is located in the five States of Texas, Kansas, Nebraska, Oklahoma and Colorado. The feed grain program is voluntary. If producers comply with program provisions and signup intentions, they qualify for price-support loans, price-support payments and acreage diversion payments.

Grains: Export prices basis prompt or 30-day shipment, April 29, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat ^{1/}		Corn	Soybeans	Barley

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

MARKET REPORT - URGENT
 Grain Market News

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Apr. 2/ 1965	Mar. 1965	Feb. 1965	Apr. 1964
Soybean Oil:					
Average price at crushing plant	Cents per lb.	12.2	12.1	12.1	7.9
Value from bushel of soybeans <u>1</u> /	Dollars	1.34	1.33	1.33	8.7
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	69.30	68.50	70.00	70.05
Value from bushel of soybeans <u>1</u> /	Dollars	1.66	1.64	1.68	1.68
Value of oil and meal from bushel of soybeans <u>1</u> /	Dollars	3.00	2.97	3.01	2.55
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.98	2.94	2.95	2.53
Spread between soybean price and value of oil and meal	Cents	2	3	6	2

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

GRAIN MARKETS MIXED

Cash grain markets showed a mixed trend for the week ended May 6. Some wheat and soybean prices weakened, but most other grains closed steady or a little higher.

Winter wheat fluctuated within a narrow range and finished generally no more than a penny higher or lower. Trading was sluggish as offerings continued to increase while mill demand slacked off. The arrival of the first truck of new-crop wheat at Houston, Texas, this week signaled the beginning of the 1965 harvest season. Spring wheat was off 2-3¢ but durum held steady. Demand for spring wheat was limited to some extent by doubts about how soon down-river barge movement could begin. Some export interest was still evident in durum circles. White wheat held steady in slow trading in the Pacific Northwest. Rye went up 3¢ in Minneapolis as short covering in the Chicago option trade pushed the nearby option up with no change in premiums.

Corn prices closed steady to 2¢ per bushel higher. Domestic and export demand provided rather broad outlets for current marketings. Planting was reported underway throughout most of the Corn Belt. Oats were not much changed. Seeding made good progress. Barley markets were generally unchanged. Grain sorghum edged up a cent or two as light offerings met active demand.

Soybeans finished 2-3¢ per bushel lower. The market still had a nervous undertone and buyers were very cautious. Inspections for export figures were favorable but this was more or less offset by the lack of any news that might spark a rally. Flaxseed held steady at Minneapolis.

WHEAT FED ... on farms where grown totaled 35.8 million bushels for the 1964-65 crop year according to estimates of the Crop Reporting Board. This is sharply above the 19.8 million fed for the 1963-64 year. Feeding was heaviest in Idaho with 4.2 million fed this season. Farm prices in Idaho for wheat averaged 10¢ per bushel under corn prices. Nearly 3.7 million bushels of wheat were fed in Pennsylvania where corn prices at the farm were higher than wheat. Both Ohio and Missouri reported heavy feeding with 3.2 million and 2.8 million fed respectively. Other States with over 1.5 million fed on farms were Indiana, Michigan and Kansas. The U. S. season average price for wheat was \$1.37 per bushel for the 1964 crop - an average premium of 21¢ per bushel over corn. For the 1963 crop the premium averaged 76¢. No survey is made of the quantity of wheat used by commercial mills for mixed feeds. The latest available survey by the Census Bureau reported a little over 4 million bushels of wheat used in commercial mixed feeds in 1961.

1965-CROP BARLEY ... terminal and county support rates announced. Barley growers in 1965 will receive the same total price support of 96 cents per bushel, national average, as they did in 1964. However, the national average loan and purchase rate will be 80 cents per bushel (4 cents per bushel below that for 1964) while the price support payment will be 16 cents per bushel (4 cents per bushel higher than for 1964). Following are the 1965 terminal price support loan and purchase rates per bushel for barley grading No. 2 or better (the rates do not include the 19¢ per bushel price support payment to 1965 feed grain program participants): Kansas City and St. Joseph 98¢; Omaha 96¢; Minneapolis and Duluth 99¢; Chicago and St. Louis \$1.03; Portland and other Pacific Northwest terminals \$1.03; Los Angeles and other California terminals \$1.07.

Grains: Export prices basis prompt or 30-day shipment, May 6, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
--Dollars--					
Duluth	No. 1 Heavy Northern				
	Spring, 14% protein..	1.82	-	-	-
Baltimore	No. 2 Soft Red Winter.	1.62	1.52	3.00	1.39
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.62	1.49	3.01	2.17
	14% protein	1.65	-	-	-
Pacific Northwest	No. 2 Western White ..	1.53	-	-	1.18

1/ The export payment rate for wheat on May 6, was 36¢ per bushel for spring wheat from Duluth, 27¢ for soft red winter from Baltimore, 25¢ for hard winter from the Gulf, and 28¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Nontransit from the East

2/ Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of March 31, 1965, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,832,396,297. Sales against the certificate pools by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$290,484,317. These sales left a combined feed grain certificate value of \$1,671,125,685 as of April 30, 1965.

GRAIN MARKET SHOWS MIXED TREND

Cash grain markets closed the week ended May 13 on a mixed note. Soybeans registered further losses, while other grains ruled unchanged to slightly higher.

Winter wheat finished steady to 2¢ per bushel higher. Support stemmed mainly from the forecast for a smaller crop this year. Dry, warm April weather depleted already short soil moisture. However, heavy rains brought some relief in the Southwest and stopped early harvesting in Texas this week. There was some export interest, but trading was generally slow as most buyers stayed on the sidelines and awaited new-crop movement in volume. Spring wheat gained 3¢ but durum held steady. Spring wheat was not offered freely, and there was more activity in the market as barges were loaded for river shipment and export loadings picked up at the head of the lakes. White wheat gained 2-3¢ in the Pacific Northwest and the dwindling supply of "free" wheat moved readily at the higher levels. Rye prices weakened at Minneapolis. There was some buying interest, but millers were looking for ergot-free rye and hesitated to advance their bids.

Cash corn closed mostly unchanged to 1¢ per bushel higher. Fairly good domestic and export demand provided ready outlets for daily offerings. Oats took a firm position as spot demand absorbed light offerings. Barley advanced 2-4¢ behind good export demand for lighter receipts in Minneapolis but lost 1-5¢ in California. Grain sorghum prices were not much changed, with light offerings finding good demand.

Soybeans lost 3-4¢ per bushel, reflecting action on the futures market, the sag in oil prices, sluggish demand for meal, and bright prospects for the new crop. Flaxseed held steady in dull trading at Minneapolis.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN: Commodity Credit Corporation Estimated Non-committed Inventory

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Volume 13 No. 20

Washington, D. C. 20250

May 21, 1965

GRAIN MARKETS UNCHANGED TO LOWER

Cash grain markets were mostly unchanged to lower for the week ended May 20. Wheat and soybeans continued on a lower trend while other grains remained about at last week's level.

Winter wheat declined 1-4¢ per bushel reflecting in part the shift to a new crop basis. Crop prospects remained generally favorable over much of the soft red winter area and in the Eastern sections of the hard winter area. Mills absorbed fair amounts but buying was limited to nearby needs. Export demand was moderate. Spring wheat declined 1¢ per bushel with crop prospects in the area generally good. Durum wheat dropped sharply with increased receipts meeting little interest. Prices were 5¢ lower on the bottom of the range. White wheat gained 1¢ in the Pacific Northwest while hard winter declined 1¢ along with the weakness in Midwest points. Rye was unchanged to 1¢ lower with good crop conditions and trade in rye flour.

Corn markets were mostly unchanged to 1¢ lower. Demand was generally good from both domestic feeders and exporters. Planting of corn was at an accelerated pace while offerings were adequate. Oats dropped 3¢ at Chicago and 1-2¢ at Minneapolis due in part to nearness of new crop. Barley was unchanged to 2¢ higher with the advance in the better qualities. Grain sorghum advanced 1¢ per cwt. at Kansas City due to the improved outlet but dropped 2¢ at Ft. Worth with plentiful supplies.

Soybeans declined 2-3¢ per bushel reflecting in part the favorable crop prospects for this year's production. Both domestic and export demand was fair. Flaxseed held steady in full trading at Minneapolis.

Wheat - rye, corn, oats, barley, grain sorghum, soybeans, and flaxseed - quantity repaid, delivered, and outstanding under price support by States	8-15
Grains - quantity under price support	16

COUNTY AND TERMINAL 1965-CROP WHEAT PRICE SUPPORT RATES ... were announced recently. Premium and discount schedules also were announced. Terminal rates will range from \$1.43 to \$1.67 per bushel. Three general changes are made in the price-support rate schedules. They deal with terminal rate adjustments, discontinuance of the sedimentation value tests, and a readjustment of other premium and discount schedules. Terminal rates are adjusted to reflect the \$1.25 per bushel national average loan and purchase price announced August 3, 1964, which is 5¢ per bushel lower than the 1964-crop national average. Total price support, however, is unchanged because higher value certificates in 1965 continue to make domestic wheat \$2.00 per bushel and export wheat \$1.55 per bushel. Wheat growers in order to get price support loans and purchases need to remain within their 1965 allotments and cooperate in the 1965 wheat program. By participating, they not only qualify for price support loans and purchases, but also for marketing certificates as well as for acreage diversion payments for diverting to such conserving uses at least 10 percent of their acreage below their 1965 acreage allotment.

PRICE SUPPORT ACTIVITIES THROUGH APRIL 1965 ... showed that farmers had put 210.7 million bushels of 1964-crop corn under price-support loan. This is the least amount of corn put under loan through April since 1955. Of the 1964-crop corn put under loan through April, farmers had redeemed loans on 22.9 million bushels. This left 187.7 million bushels still under loan at the end of the month. Farmers also had redeemed loans through April on 70.2 million bushels of wheat, nearly 15.1 million bushels of soybeans, 9 million bushels of barley, 7.6 million bushels of oats, and 3.7 million cwt. of grain sorghum. (See other price support details on pages 8-16.)

Grains: Export prices basis prompt or 30-day shipment, May 20, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

^{1/} The export payment rate for wheat on May 20, was 38¢ per bushel for spring wheat from Duluth, 21¢ for soft red winter from Baltimore, 25¢ for hard winter from the Gulf, and 28¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

^{2/} No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
 All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

GRAIN MARKETS UNCHANGED TO HIGHER

Cash grain markets were mostly unchanged to slightly higher for the week ended May 27. Barley, soybeans, and flaxseed strengthened, while rye and hard winter wheat were on the weak side.

Hard winter wheat held about steady at Kansas City but closed 2-3¢ lower at Ft. Worth with harvest delayed by wet fields. New-crop harvest was underway in Oklahoma. Lower protein wheats were weaker at Kansas City with some improvement in demand by mills. Soft red winter strengthened at Chicago with increased elevator interest. Spring wheat was unchanged to 1¢ higher with a fairly strong demand for wheat at diversion points. Durum wheat held steady in light trading. Soft white wheat gained 2-3¢ per bushel in the Pacific Northwest as exporters were pushing to fill commitments. Rye dropped 1¢ based on expectations of a good crop and a large carryover.

Corn markets closed unchanged to 1¢ lower although a firmer undertone was evident. Both export and domestic buyers were taking a fair quantity. Oats ruled firm to a penny higher reflecting a good demand for the light offerings. Barley advanced 2-4¢ with a good demand from maltsters for intermediate grades at Minneapolis and for light supplies at Portland. Grain sorghum held firm in very light trading.

Soybeans fluctuated throughout the week and closed 3-7¢ per bushel above a week ago. Demand was good from both processors and exporters. Trade reports indicate that large quantities of terminal stocks are earmarked for export later with heavy shipments moving to the Gulf for export. Flaxseed gained 2¢ in light trading at Minneapolis.

1965-CROP GRAIN SORGHUM TERMINAL AND COUNTY SUPPORT LOAN RATES ... were announced this week. The 1965-crop total national average support price of \$2.00 per cwt. for grain sorghum grading No. 2 or better was announced Dec. 15, 1964. While the total support level is identical to those for both 1963 and 1964 crops, the 1965-crop support reflects an average loan and purchase rate of \$1.65 per cwt. with a payment-in-kind of 35¢, compared to 1964-crop rates of \$1.77 for loans and 23¢ for payment-in-kind. All terminal price support loan and purchase rates for the 1965 crop reflect this 12¢ per cwt. adjustment in the loan portion of the support. Rates for terminals in the Missouri River area, where rail freight changes took place in 1964, are further reduced 8¢ per cwt. so that the county rates based on these terminals will more nearly reflect historical price relationships with other areas. Following are the 1965 terminal rates per cwt. for grain sorghum grading No. 2 or better with the 1964 rates in parentheses (excludes the 35¢ to cooperators under the 1965 feed grain program and 23¢ for the 1964 program): Omaha \$1.83 (\$2.03); Kansas City \$1.93 (\$2.13); Galveston and Houston \$2.17 (\$2.29); and St. Louis \$2.07 (\$2.19).

SOYBEAN PROCESSORS CRUSHED 38.2 MILLION BUSHELS OF SOYBEANS ... during April as compared with 40.8 million in March and 35.3 million in April 1964. This brought the total quantity crushed in the 7-month period, October-April, to 291 million -- 32 million more than in the same period last season. Exports in the first 7 months totaled nearly 139 million as against 127 million a year earlier. Supplies of soybeans on May 1 for processing, export, or carryover totaled 255 million this year compared with 278 million a year ago and 265 million two years ago. Stocks of soybeans at processing plants at the first of May totaled 96.7 million bushels as against 56.3 million a year earlier.

Grains: Export prices basis prompt or 30-day shipment, May 27, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat 1/		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum 2/
			--Dollars--		
Duluth	No. 1 Heavy Northern Spring, 14% protein.	1.85	-	-	-
Baltimore	No. 2 Soft Red Winter	1.65	1.51	2.99	1.40
Gulf	No. 1 Hard Winter: Ordinary protein	1.62	1.48	3.00	2.17
	14% protein	1.65	-	-	-
Pacific Northwest	No. 2 Western White ..	1.60	-	-	1.22

1/ The export payment rate for wheat on May 27, was 39¢ per bushel for spring wheat from Duluth, 23¢ for soft red winter from Baltimore, 28¢ for hard winter from the Gulf, and ¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
 All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	May 1965 ^{2/}	Apr. 1965	Mar. 1965	May 1964
Soybean Oil:					
Average price at crushing plant	Cents per lb.	10.6	12.2	12.1	8.4
Value from bushel of soybeans <u>1/</u>	Dollars	1.17	1.34	1.33	9.2
Soybean Meal 44%:					
Bulk price at Decatur	Dollars per ton	68.60	69.25	68.50	65.10
Value from bushel of soybeans <u>1/</u>	Dollars	1.65	1.66	1.64	1.56
Value of oil and meal from bushel of Soybeans <u>1/</u>	Dollars	2.82	3.00	2.97	2.48
Market price of No. 1 yellow soybeans at Illinois points	Dollars per bu.	2.81	2.97	2.94	2.47
Spread between soybean price and value of oil and meal	Cents	1	3	3	1

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 48.0 pounds of meal for crop year 1963-64.

2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

Soybeans and Flaxseed: Supply and distribution

The above rates on wheat and wheat flour shall serve as the export allowances to be used on establishing prices for CCC wheat for export under Announcements GR-261 and GR-262 as provided therein.

a/ Cost of export marketing certificates for wheat exported on or after 7/1/65 will be 30 cents per bu. Such wheat will be eligible for the announced rate plus 5 cents per bu.

b/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply.

c/ Excluding Durum wheat.

d/ The rate for the period 7/16/65 thru 12/31/65 applies to sales for shipment from California ports during the period 6/1/65 thru 12/31/65, subject to a five cent reduction if shipment occurs prior to July 1.

e/ Cost of domestic marketing certificates on wheat milled into flour on or after 7/1/65 will be 75 cents per bushel. Exports of flour milled in such period will be eligible for the announced rate plus 11 cents per cwt. Exporters must obtain a certification from the miller stating the cost of domestic marketing certificates. Flour milled in part from certificated and non-certificated wheat or flour milled from wheat on which different certificate costs apply and exported pursuant to a single registered sale shall be eligible for a rate determined on a pro rata basis.

Volume 13 No. 22

Washington, D. C. 20250

June 4, 1965

WHEAT PRICES LOWER-SOYBEANS ADVANCE

Cash grain markets closed on a generally weaker trend with wheat and rye prices lower for the week ending June 3, 1965. Soybeans, however, turned sharply higher while other grains showed little or no change.

Hard winter wheat declined 2-3¢ per bushel as limited harvest was resumed in the Southwest. Combining was hampered by wet weather in many areas. Some traders are concerned about a shortage of high protein wheat this season. Demand for soft red wheat was fair but prices were mostly 2-3¢ lower. Spring wheat dropped 6-8¢ per bushel reflecting nearness of new crop offerings and adjustments to lower values for hard winter wheats. Most bakers were well supplied and were stretching supplies for cheaper wheat. Durum remained at the level of a week ago at Minneapolis. White wheat advanced 1¢ per bushel. Strength stemmed from a fair export demand and scant supplies. Rye declined 4¢ per bushel reflecting large stocks and lack of export interest combined with good new crop conditions.

Cash corn markets closed unchanged to a penny lower. Country sellings were light while export interest was moderate. Moisture supplies are adequate in most areas. Oats ranged from a penny higher to a penny lower in dull market. No. 2 whites sold at 75-81¢ per bushel at Kansas City and 76¢ in Chicago for extra heavy. Barley markets continued strong but little or no price change was noted. Grain sorghum held steady with a fair demand for slightly larger offerings.

Soybeans advanced 5-6¢ per bushel with a continued good export demand. Crusher needs provided additional strength. Soybean meal prices were also higher but oil was weak. Flaxseed held unchanged at Minneapolis with trading very light.

Special Feature

Page

Grains - export prices at specified points 4

NOTE: Due to the relocation of the Grain Division including the Market News Branch to Hyattsville, Maryland, some of the tables regularly carried are omitted in this report.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Volume 13 No. 23

Hyattsville, Maryland 20781

June 11, 1965

MOST GRAIN MARKETS ADVANCE

Most cash grain markets strengthened during the week ended June 10, with wheat and soybeans leading the upswing.

Hard winter wheat finished mostly 1-2¢ per bushel higher as rains delayed harvesting throughout the Southwest. Receipts were lighter. Mills and exporters competed for current offerings. Soft red wheat borrowed firmness from the hard wheat division, but buyers showed a cautious attitude. Spring wheat went up 2-3¢ but buyers resisted making purchases at the present level. Receipts were light but buying was held to a minimum by slow flour sales. Durum held steady behind fair demand for light receipts. White wheat proved an exception to the general trend as prices dropped 5-6¢ in the Pacific Northwest. Old-crop white wheat was scarce, but CCC sales and indication of an early harvest eased the pressure of supply for foreign commitments. Rye held steady in Minneapolis.

Corn prices closed mostly unchanged as both domestic buyers and exporters continued to compete for spot offerings. Oats continued to sell good and prices looked firm. Barley finished unchanged to 4¢ lower in Minneapolis as offerings became more liberal. Prices were not much changed at other markets. Grain sorghum advanced 5¢ per cwt. at Ft. Worth where offerings were fairly tight and mixers and feed manufacturers raised their bids to get needed lots. Sorghum held steady at Kansas City, however, where offerings continued slow.

Soybean prices closed 1-3¢ per bushel higher for the week after fluctuating considerably throughout the period. The market had a nervous undertone, with spot trading influenced by world news, trade interpretations of crop conditions, exports, and action on the oil and meal markets. Flaxseed dropped 5¢ at Minneapolis, largely as a result of a similar drop on the Winnipeg market.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

^{1/} July 1, 1964-May 28, 1965 for wheat, rye, oats, barley, grain sorghum, and flaxseed; October 1, 1964-May 28, 1965 for corn and soybeans.

^{2/} Less than 1,000 bushels.

The Agricultural Stabilization and Conservation Service reported total value, as of April 30, 1965, of feed grain certificates issued for crop-years 1962, 1963, and 1964 was \$2,832,645,188. Sales against the certificate pools, by crop year, were: 1962 \$751,522,629; 1963 \$119,263,666; and to date in 1964 \$331,267,741. These sales left a combined feed grain certificate value of \$1,630,591,152 as of April 30, 1965.

SOME WHEAT HIGHER - OTHER GRAINS DOWN

Some hard winter and spring wheat prices advanced during the week ended June 17, but most other cash grain markets weakened. Weather news and crop progress reports were important factors.

Hard wheat prices were not much changed on the ordinary proteins except at Ft. Worth where a 3¢ per bushel gain was registered. Higher protein wheat, however, advanced 1-5¢ at Kansas City. Rains and muddy fields continued to hamper combining of the new crop in the Southwest. Farmers sold freely, but many new-crop offerings were of low protein and high moisture. At the same time, offerings of high protein old-crop wheat were scarce. Domestic mills were fairly active, particularly those needing high-protein wheat for mixing. Exporters showed less interest than mills. Soft red wheat prices weakened at Chicago as weather news was less of a supporting factor and crop prospects remained favorable. Spring wheat advanced 5-7¢ as mills raised bids on moderate offerings to cover a fair quantity of recent flour sales and a heavy grinding schedule. Durum wheat held steady in listless trading. White wheat showed little change in quiet trading in the Pacific Northwest. Rye lost a couple of cents behind limited demand at Minneapolis.

Corn markets weakened as continued strong domestic and export demand was offset by increased offerings. Oats prices slipped a cent or two as limited receipts found less aggressive demand and more favorable weather conditions for the growing crop. Barley was not much changed but some of the lower qualities dropped 8-10¢ at Minneapolis where receipts were again quite large and urgent needs apparently had been satisfied. Grain sorghum held firm at Ft. Worth but lost 3¢ per cwt. at Kansas City as light offerings found less demand.

Soybean prices fluctuated daily and closed 2-4¢ per bushel lower. Spot trading continued to reflect the influence of oil and meal activity, futures market, world news, and various trade analyses of export, crushing, carry-over, and new-crop production statistical data. Flaxseed was off 2¢ behind narrow demand at Minneapolis.

Wheat, rye, oats, barley, grain sorghum, soybeans and flaxseed - quantity repaid, delivered, and outstanding under price support by States	9-15
Grains - quantity under price support	16

PRICE SUPPORT OPERATIONS THROUGH MAY 31 ... show the lowest level of corn put under loan in 10 years. This year farmers had put 213 million under loan by the end of May as against 383 million last year and 530 million two years ago. Of the total put under loan farmers had repaid loans on 32 million bushels. Due to the larger 1964 crop farmers put 197 million bushels of wheat under support this season as against 172 million last season. By the end of May farmers had repaid loans on 74 million -- 10 million less than a year earlier -- and had delivered 61 million bushels to CCC as against 57 million by May 31, 1964. Reflecting the higher prices, farmers put less than 29 million bushels of 1964-crop soybeans under loan as against 73 million from the 1963 crop. Farmers had repaid loans on 18 million -- about the same as last year -- leaving 10 million still outstanding under support as against 55 million a year earlier. Of the 46 million cwt. of grain sorghum put under loan this season farmers had delivered 35 million to CCC as against 66 million delivered by the end of May in 1964. (Details pp. 8-16).

WHEAT SUPPLIES ON JUNE 1 ... for export or carryover in the four principal exporting countries (United States, Canada, Argentina and Australia) totaled 1,855 million bushels this year as against 1,818 million a year ago and 1,991 million two years ago. Smaller supplies in United States and Canada were more than offset by larger stocks in Argentina and Australia. Exports of 1.2 billion bushels since the beginning of the season are 145 million less than last season. (Details p. 6).

FLAXSEED EXPORTS ... under the payment-in-kind export program totaled 1,566,000 bushels on the basis of registrations since the beginning of the program on April 16. Registrations of linseed oil under the same program totaled 6,919,200 pounds by June 17. Most of the exports of both the linseed oil and flaxseed are destined for The Netherlands.

Grains: Export prices basis prompt or 30-day shipment, June 17, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Pacific Northwest	No. 2 Western White	: 1.56	-	-	1.20

1/ The export payment rate for wheat on June 17, was 38¢ per bushel for spring wheat from Duluth, 23¢ for soft red winter from Baltimore, 28¢ for hard winter from the Gulf, and 25¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.

Volume 13 No. 25 Federal Center Bldg. - Hyattsville, Md. 20781 June 25, 1965

SOYBEANS ADVANCE -- FEED GRAINS FIRM

Soybean prices continued to advance while feed grains were steady to higher for the week ended June 24. Wheat was mostly unchanged to a little lower while rye and flaxseed were unchanged.

Winter wheat fluctuated fractionally during the week closing about unchanged to 1¢ per bushel lower on the low protein wheats. Premiums for higher proteins gained 2¢ during the week with the demand mainly from millers. Exporters were active in June delivery. The protein of wheat received at Kansas City during the week was well below a year ago. Trading in soft red winter wheat was light. Spring wheat was unchanged to 1¢ lower with buying limited to nearby needs. Mills are operating full time prior to June 30 when cost of certificates advance 5 cents. Durum markets were quiet with a 2¢ loss at the top of the range. White wheat in the Pacific Northwest was steady in a quiet market with most trading on a new crop basis. Rye was on the weak side with limited flour sales.

Corn was mostly 1¢ higher with a steady demand for light receipts. Rains hindered marketing but helped the new crop which is in generally good condition. Oats were firm with minor price changes for limited offerings. Barley prices tended lower with choice malting down 2¢ at Minneapolis. Grain sorghum prices were unchanged to 2¢ higher with slow trading for light offerings.

Soybeans went up another 10¢ as available supplies began to dwindle and crushings and export continue at a record rate. Processors crushed 40.9 million bushels in May with the season's total 12 percent above a year ago. Exports, on the basis of inspections through June 18, were 17 million bushel above the same period last year. Flaxseed held steady at Minneapolis.

Special Features

Page

Grains - export prices at specified points	2
Wheat - inspected receipts by class at selected markets, May	6-7
Grains - inspected receipts at selected markets, May	8-9
Grains - CCC-owned stocks by States, May 31, 1965	10
Wheat - CCC-owned stocks by position, May 31, 1965	11
Soybeans and flaxseed - supply and distribution, monthly	12

SOYBEAN CARRYOVER STOCKS DATE CHANGED ... from October 1 to September 1. The Crop Reporting Board will show the carryover of old-crop farm stocks as of September 1 in the Crop Report issued on September 10. Total carryover stocks will be published September 23, 1965. The change reflects the earlier soybean harvest with a considerable amount of new-crop processed and exported in September.

CCC-OWNED GRAIN INVENTORY BY STATES ... will now be available on a monthly basis. This inventory has been reported only quarterly prior to the current data. CCC Inventory by States is shown on pages 10 and 11 of this report. It is planned to carry this data in Grain Market News regularly on a total by States. Once every three months the breakdown by country and terminal warehouses and CCC-owned bin sites will be shown for wheat and corn.

SOYBEAN PROCESSORS CRUSHED 40.9 MILLION BUSHEL OF SOYBEANS ... during May as compared with 38.2 million in April and 36.3 million in May 1964. This brought the total quantity crushed in the 8-month period, October-May, to 332 million bushels -- 37 million more than in the same period last season. Exports in the first 8 months totaled 156 million bushels as against 141 million a year earlier. Supplies of soybeans on June 1 for processing, export or carryover totaled 197 million this year compared with 228 million a year ago. Stocks of soybeans at processing plants at the first of June totaled 72.4 million as against 48.5 million a year earlier.

Grains: Export prices basis prompt or 30-day shipment, June 24, 1965
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain sorghum <u>2/</u>
--Dollars--					
Duluth	No. 1 Heavy Northern Spring, 14% protein	1.85	-	-	-
Baltimore	No. 2 Soft Red Winter	1.59	1.53	3.11	1.42
Gulf	No. 1 Hard Winter:				
	Ordinary protein	1.62	1.49	3.15	2.17
	14% protein	1.66	-	-	-
Pacific Northwest	No. 2 Western White ...	1.54	-	-	1.19

1/ The export payment rate for wheat on June 24, was 38¢ per bushel for spring wheat from Duluth, 25¢ for soft red winter from Baltimore, 29¢ for hard winter from the Gulf, and 25¢ for white wheat from the West Coast. To compute indicated net price to foreign buyer, add 25¢ (export certificate) to above price and subtract appropriate export payment rate.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with loan rates at principal terminals
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

^{1/} Effective price support loan rate is the established terminal loan rate minus a deduction for storage as of the date shown. Terminal loan rates are not established for corn, oats, or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston loan rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

^{2/} Simple average of daily closing prices.

^{3/} Not available since quality premiums are based on a combination of the sedimentation test and the protein test.

^{4/} Non-transit from the East.
